Summary

Software Engineer with 3+ years of experience building web and mobile products, from freelance client work to multi-tenant SaaS. At Yamama Software I work across the stack on two live products: GlooFloo, a bilingual AI-powered project and portfolio management platform (React web app, Node.js/PostgreSQL API, Flutter mobile app), and Rawaylo, an AI call center for restaurants. I take features from requirements to production with tests, reviewed pull requests and staged releases, and work closely with the business side on requirements, pricing and sales material.

Skills

Languages: TypeScript, JavaScript (ES6+), Dart, SQL, HTML5, CSS3

Frontend: React 19, Next.js, TanStack (Start, Router, Query), Redux Toolkit, Zustand, Tailwind CSS v4, Radix UI / shadcn/ui, Framer Motion, GSAP, Three.js, React Hook Form + Zod, i18n & RTL, accessibility

Backend: Node.js, Hono, Express, REST APIs, PostgreSQL (row-level security, pgvector), Drizzle ORM, Better Auth (SSO, passkeys, OAuth), NATS JetStream, S3-compatible storage, Supabase, Odoo (Python modules)

Mobile: Flutter, Riverpod, Drift (offline-first), go_router, Firebase Cloud Messaging, RevenueCat in-app subscriptions

AI: LLM integration (Claude, Gemini), tool-calling assistants, model routing & budget guards, MCP servers (OAuth 2.1), voice pipelines (speech-to-text → LLM → text-to-speech)

Payments & security: Moyasar, Paymob, Stripe, manual transfer flows (InstaPay / mobile wallets), webhook signature verification, multi-tenant isolation, two-factor authentication

Engineering practice: API & database design, migrations, clean architecture, testing (Vitest, Playwright, axe, Flutter integration tests), CI/CD with GitHub Actions, Docker, code review, Agile/Scrum, Jira

Experience

Software Engineer

Yamama Software

Aug 2026 – Present

- **GlooFloo** (gloofloo.com) — AI-powered project & portfolio management SaaS in Arabic and English: deliver features end to end across the React/TanStack web app and the Hono + PostgreSQL API — migrations, multi-tenant row-level security, UI and tests — through reviewed pull requests, staging and production releases.
- Built the AI layer: an assistant that runs product actions as tools, Claude model routing by task with a monthly budget guard, credit charging based on the actions actually performed, and an MCP server (OAuth 2.1) that lets AI clients such as Claude and ChatGPT work with a user's plans.
- Led the November 2026 redesign of the GlooFloo web app: new design system and typography, Arabic/English-only localisation, a lazy-loaded 3D hero, accessible custom controls, responsive and bundle-size budgets — shipped to production.
- Building the GlooFloo Flutter app (iOS & Android) toward its v1.0 store release: web feature parity (Kanban board, Gantt timeline, calendar, files, AI assistant), offline-first local database, push notifications and in-app subscriptions.
- Added revenue and growth flows: manual InstaPay/wallet payments with admin activation, a required phone number at sign-up and checkout, and analytics events for the marketing funnel.
- **Rawaylo** (rawaylo.com, live since November 2026) — AI call center for restaurants in Egypt: backend and dashboard (conversation inbox with human handoff, credit-ledger billing, Google sign-in), a voice and chat pipeline (Soniox speech recognition + Claude) for ordering by chat and browser call, and a restaurant edition built on Odoo (POS, kitchen display, delivery).

- Product and business support: product requirement documents, pricing and unit-cost analysis, client presentation decks and product videos, and technical input for enterprise tender proposals.

Frontend Developer
VClasses | Cairo, Egypt
Oct 2025 – Jul 2026

- Built a Next.js 15 multi-tenant educational platform with TypeScript, Tailwind CSS v4 and next-intl (Arabic/English, RTL).
- Engineered ISR cache invalidation, a multi-landing-page switching system and CSS custom-property theming from Figma designs.
- Integrated TanStack Query 5 + Redux for the API data layer; achieved 90+ Lighthouse scores and ~40% faster load times.

Freelance Frontend Developer
Self-Employed | Remote
Sep 2023 – Sep 2025

- Delivered 10+ client projects — e-commerce platforms, 3D web experiences, landing pages — with authentication, payments and CI/CD on Vercel and Netlify; about 80% of clients returned with repeat work.

Frontend Developer Intern
Digitalize for Business Services | Cairo, Egypt
Mar 2024 – Aug 2024

- Developed a reusable React/TypeScript UI component library in a 5-person Agile team; contributed to code reviews and rendering-performance improvements.

Projects

ShiftSouq — Full-Stack E-Commerce Platform
Stack: Next.js 16, React 19, Supabase, Paymob, Tailwind v4, Zustand, Zod
GitHub: github.com/abdelrahman-samy-dev/shiftsouq-ecommerce | Live: shiftsouq.vercel.app

- Bilingual (AR/EN, RTL) store with Supabase PostgreSQL + RLS, an admin dashboard for products and inventory, and Paymob payments (card + mobile wallet) with HMAC webhook verification.

تراتيل (Taratil) — Islamic PWA
Stack: Vanilla JS (ES6+), Service Workers, PWA
GitHub: github.com/abdelrahman-samy-dev/taratil-quran | Live: taratil-quran.vercel.app

- Offline-first Quran reader (600 pages) with audio sync, Azkar counters and a custom stale-while-revalidate cache; installable on iOS, Android and desktop, 90+ Lighthouse score.

Education

B.Sc. Computer Science — Information Systems
Helwan University, Cairo
2017 – 2021
Graduation project: Antique Auction App — Grade: Excellent
