Summary

Software developer who builds and ships web and mobile products, with a frontend focus. At Yamama Software I work on two live products: GlooFloo, a bilingual AI-powered project management SaaS (React web app, Node.js/PostgreSQL API, Flutter mobile app), where I led the web redesign, and Rawaylo, an AI call center for restaurants that I built end to end. I take features from requirements to production with tests, reviewed pull requests and staged releases.

Skills

Languages: TypeScript, JavaScript (ES6+), SQL, Dart, HTML5, CSS3

Frontend: React 19, Next.js, TanStack (Start, Router, Query), Redux Toolkit, Zustand, Tailwind CSS v4, Radix UI / shadcn/ui, React Hook Form + Zod, i18n & RTL, accessibility

Backend: Node.js, Hono, Express, REST APIs, PostgreSQL (row-level security), Drizzle ORM, Better Auth, Supabase

Mobile: Flutter, Riverpod, Drift (offline-first), go_router, Firebase Cloud Messaging

AI: LLM integration (Claude, Gemini), tool-calling assistants, MCP servers, speech-to-text and voice pipelines

Engineering practice: API & database design, migrations, testing (Vitest, Playwright, axe), CI/CD with GitHub Actions, Docker, code review, Agile/Scrum, Jira

Experience

Software Developer
Yamama Software
Aug 2026 – Present

- **GlooFloo** (gloofloo.com) — AI-powered project management SaaS in Arabic and English: deliver features end to end across the React/TanStack web app and the Hono + PostgreSQL API — migrations, multi-tenant row-level security, UI and tests — through reviewed pull requests, staging and production releases.
- Built the AI assistant: product actions run as tools, Claude model routing by task, credit charging based on the actions performed, and an MCP server (OAuth 2.1) that lets AI clients work with a user's plans.
- Led the November 2026 redesign of the GlooFloo web app: new design system and typography, Arabic/English-only localisation, accessible custom controls and a lazy-loaded 3D hero — shipped to production.
- Building the GlooFloo Flutter app (iOS & Android) toward its v1.0 store release: Kanban board, Gantt timeline, calendar, files, AI assistant, offline-first local database and push notifications.
- Added payment and growth flows: manual InstaPay/wallet payments with admin activation, a required phone number at sign-up and checkout, and analytics events for the marketing funnel.
- Built **Rawaylo** (rawaylo.com, live since November 2026), an AI call center for restaurants: backend and dashboard (conversation inbox with human handoff, credit-ledger billing), a chat and voice ordering pipeline (speech recognition + Claude), and a restaurant edition on Odoo.

Frontend Developer
VClasses | Cairo, Egypt
Oct 2025 – Jul 2026

- Built a Next.js 15 multi-tenant educational platform with TypeScript, Tailwind CSS v4 and next-intl (Arabic/English, RTL).
- Implemented ISR cache invalidation, a multi-landing-page switching system and CSS custom-property theming from Figma designs.
- Integrated TanStack Query 5 and Redux for the API data layer, working with the backend team on REST API contracts.

Frontend Developer Intern
Digitalize for Business Services | Cairo, Egypt
Mar 2024 – Aug 2024

- Developed a reusable React/TypeScript UI component library in a 5-person Agile team, with code reviews and sprint ceremonies.

Freelance Frontend Developer (part-time)
Self-Employed | Remote
Sep 2023 – Sep 2025

- Selected client projects alongside other work: landing pages and small web apps with React and Next.js, deployed on Vercel and Netlify.

Digital Support Specialist
Telecom Egypt (WE) | Egypt
Sep 2022 – Nov 2023

- Digital customer support at Egypt's national telecom operator.

Projects

تراتيل (Taratil) — Quran Progressive Web App
Stack: Vite, Preact, TypeScript, Workbox, PWA
GitHub: github.com/abdelrahman-samy-dev/taratil-quran | Live: taratil-quran.vercel.app

- Offline-first Quran app with a 604-page Mushaf, verse-synced audio for about 115 recitations, prayer times, Azkar and Tafsir; 162 unit and 11 Playwright end-to-end tests; Lighthouse accessibility, SEO and best practices at 100.

ShiftSouq — Full-Stack E-Commerce Platform
Stack: Next.js 16, React 19, Supabase, Paymob, Tailwind v4, Zustand, Zod
GitHub: github.com/abdelrahman-samy-dev/shiftsouq-ecommerce | Live: shiftsouq.vercel.app

- Bilingual (AR/EN, RTL) store with Supabase PostgreSQL + RLS, an admin dashboard for products and inventory, and Paymob payments (card + mobile wallet) with HMAC webhook verification.

Education

B.Sc. in Information Systems
Faculty of Computers and Artificial Intelligence, Helwan University, Cairo
2017 – 2021
Graduation project: Antique Auction App — Grade: Excellent
